# Environmental liability bolt-on endorsement

Everything you need to know

## Coverage information

### Products pollution liability:

- Coverage includes bodily injury, property damage and clean-up costs from pollution conditions stemming from products sold

### Transportation pollution liability:

- Coverage includes bodily injury, property damage and clean-up costs from pollution conditions over the road, including loading and unloading

### Non-owned disposal sites:

- Coverage includes bodily injury, property damage and clean-up costs from pollution conditions stemming from disposal sites

### Sudden and accidental premises pollution:

- Coverage includes bodily injury, property damage and clean-up costs stemming from premises

## Who are our policy holders

All manufacturing operations involve some level of pollution exposure—whether from on-site chemicals, production or cleaning processes, product content or waste. This coverage fills gaps not typically addressed by standard general liability policies and broadly applies to manufacturing risks, excluding the "no-go classes".

## Commonly targeted manufacturing segments

- Chemical manufacturing
- Coatings, plastics, containers/drums
- Tanks or tank parts
- Abrasives
- Intermediate chemicals in cosmetics, health, beauty, food products, fertilizers and pesticides

## No-go classes

- Personal protection equipment
- Crum rubber/astro turf
- Fire fighting foam, water proofing materials
- Hair relaxing, smoothing or straightening products
- Critical auto/aircraft components
- Asbestos products
- Invasive medical devices
- Ingestible products
- Energy products
